MEMORANDUM ON THE OBJECTS OF THE NATIONAL HEALTH INSURANCE BILL, 2019

1. BACKGROUND

1. General

- 1.1 Cabinet approved the policy for the transformation of the South African health care system to achieve universal coverage for health services, which includes the creation of a National Health Insurance Fund as a strategy for moving towards Universal Health Coverage (UHC).
- 1.2 The aim of universal health coverage is to provide South Africans with—
 - (a) access to needed health care that is of sufficient quality to be effective; and
 - (b) financial protection from the costs of health care.
- 1.3 The National Health Insurance Bill, 2019 (“Bill”), seeks to provide for the universal access to health care services in the Republic in accordance with the National Health Insurance White Paper and the Constitution of South Africa, 1996 (“Constitution”). The Bill envisages the establishment of a National Health Insurance Fund (“Fund”) and sets out its powers, functions and governance structures. The Fund will purchase health care services for all users who are registered with the Fund. The Bill will also create mechanisms for the equitable, effective and efficient utilisation of the resources of the Fund to meet the health needs of users and preclude or limit undesirable, unethical and unlawful practices in relation to the Fund and its users.
- 1.4 The Preamble recognises the socio-economic imbalances and inequities of the past, the need to heal the divisions of the past, the need to establish a society based on democratic values, social justice and fundamental human rights and the need to improve the quality of life of all citizens. The Preamble also takes cognisance of Article 12 of the United Nations Covenant on Economic, Social and Cultural Rights, 1966, which provides for the right of everyone to the enjoyment of the highest attainable standard of physical and mental health, and of Article 16 of the African Charter on Human and People’s Rights, 1981, which provides for the right to enjoy the best attainable state of physical and mental health. The Preamble also recognises the right to have access to health care services, including reproductive health care as provided for in section 27(1)(a) of the Constitution as well as the obligation on the State to take reasonable legislative and other measures, within its available resources, to achieve the progressive realisation of the right of access to health care services as provided for in section 27(2) of the Constitution.

2. ADDRESSING BARRIERS TO ACCESS

2.1 Structural challenges in the health system

- 2.1.1 There is a need for reform of both the health care financing and service delivery systems so that all South Africans have access to affordable, quality personal health care services regardless of their socio-economic status within the context of the burden of disease in South Africa.
- 2.1.2 The main problem relates to the fragmentation of health care fund pools in the South African health system and the aim is to create an integrated pool in order to achieve universal health coverage for health

care services by establishing a purchaser-provider split with the Fund being the single-payer for comprehensive health care services purchased on behalf of users.

- 2.1.3 The barriers to access that need to be addressed are—
- (a) an onerous burden of out-of-pocket payments on some individuals due to the uneven implementation of user fee exemptions at public hospitals and the high cost of care in the private sector;
 - (b) distance to health facilities remains a major barrier to access, including in terms of the availability and costs of public and emergency transport;
 - (c) lack of sufficient, qualified staff within the public health sector relative to the size of the population served by this sector;
 - (d) maldistribution of health care providers between geographic areas, with a concentration in large urban areas;
 - (e) weak purchasing and incentive mechanisms;
 - (f) fragmented funding and risk pools, which limit the potential for income and risk cross-subsidies; and
 - (g) inefficient provider payment mechanisms in both the public and the private health sectors.

2.1.4 In order to achieve the objectives listed below, there must be a reconfiguration of the institutions and organisations involved in the funding, pooling, purchasing and provision of health care services in the South African health system.

2.2. The implementation of reforms in the period leading up to the enactment and in the first five years after the enactment of the Bill will take place in six phases:

2.2.1 The intermediate preparatory phase involves improving the quality of the health system by first certifying the health facilities to ensure they meet the requirements of the Office of Health Standards Compliance.

2.2.2 Initiate the establishment of the administration necessary to develop and manage the Fund whilst simultaneously introducing a national quality improvement plan that helps facilities to be certified and accredited to provide health care services to be funded under the National Health Insurance (“NHI”).

2.2.3 The Fund and its Executive Authority will bid for funds through the main budget as part of the budget process to expand coverage using certified and accredited public and private sector health facilities. This phase will focus on fully establishing the purchaser-provider split and associated reforms, such as changing provider payment mechanisms and the implementation of the Fund’s institutional arrangements.

2.2.4 Shift some of the conditional grants such as the National Tertiary Services grant and the HIV/AIDS and TB grant from the Department of Health into the Fund and continue with step 2.2.3.

2.2.5 Shifting some or all of the funds currently in the provincial equitable share formula for personal health care services (currently the main public health funding stream) to the Fund to gradually extend these delivery and management reforms to all districts and public hospitals.

2.2.6 The final phase will largely relate to expanding coverage in terms of being able to accommodate the maximum projected utilisation rates and gradually increasing the range of services to which there is a benefit entitlement. In a favourable economic environment there will be an initiation of the evaluation of new taxation options for the Fund including evaluating a surcharge on income tax, a small payroll tax or as financing sources for NHI.

- 2.3 This phased approach will be described in more detail in a series of implementation plans by the Department of Health, and will be updated regularly on the basis of insights gained from piloting some of the activities and careful monitoring of each phase.
- 2.4 The purpose of the introduction of the reforms mentioned in paragraph 2.2 above is to ensure consistency with the global vision that health care should be seen as a social investment and not be subject to trading as a commodity. The universal health coverage system is a reflection of the kind of society we wish to live in: one based on the values of social solidarity, equity, justice and fairness.

3. AFFORDABILITY AND SUSTAINABILITY

- 3.1 A legitimate concern is the affordability and sustainability of National Health Insurance in South Africa. This can best be considered with reference to the nature of the proposed system and the checks and balances that will be put in place to limit unnecessary expenditure increases for supply-side as well as demand-side management.
- 3.2 Affordability and sustainability can be addressed as follows:
- 3.2.1 Placing increased emphasis on health promotion and preventive services and outlining how this will be achieved (e.g. through the activities of ward health agents);
 - 3.2.2 establishing high quality primary health care services as the foundation of the health system, to ensure that the majority of health problems can be diagnosed and treated at this level;
 - 3.2.3 introducing a mechanism for 'gatekeeping' through a primary health care approach and referral system, where patients access higher level services on the basis of referral networks;
 - 3.2.4 a system of priority setting that emphasises health promotion and disease prevention and in which medically necessary interventions are used;
 - 3.2.5 improving public health facility infrastructure and to strengthen district health management; and
 - 3.2.6 removing duplicative administration and repeat diagnostic testing experienced in the present fragmented system thus saving resources for patient care.

4. STRENGTHENING PRIMARY HEALTH CARE ("PHC") SERVICES

- 4.1 Building a high quality and effective PHC service delivery platform is the foundation upon which the health system will be based.
- 4.2 The PHC service delivery platform will be facilitated and coordinated by the District Health Management Offices and services will be delivered in a comprehensive and integrated way.
- 4.3 There will be an increased emphasis on health promotion and preventive services, in addition to improving curative and rehabilitative services.
- 4.4 The delivery of primary health care services will be population-orientated with extensive use of community and home-based services in addition to PHC facilities, follows:
- 4.4.1 PHC outreach teams will be deployed in each municipal ward, supported by a nurse and linked to a PHC facility such as a clinic;

- 4.4.2 PHC outreach teams will be allocated households that they will visit on a regular basis. They will provide health promotion education, identify those in need of preventive (e.g. immunisations), or rehabilitative services and refer them to the relevant PHC facility;
 - 4.4.3 outreach teams will also facilitate community involvement and participation in identifying health problems and behaviours that place individuals at risk of disease or injury and implement appropriate interventions to address these problems at a community level; and
 - 4.4.4 school health services will be provided to improve the physical and mental health and general well-being of school going children, including pre-Grade R, and Grade R up to Grade 12.
- 4.5 Private primary health care providers will be drawn on to increase service delivery capacity and to improve access to needed health services, especially in under-served rural and informal urban areas.
 - 4.6 Contracting arrangements will be explored, including improved sessional appointments; contracts to deliver comprehensive PHC services from government health facilities or mobile health posts; and contracts with multi-disciplinary group or network practices operating from private premises.
 - 4.7 Contracted private providers will be integrated into the PHC service delivery platform in line with the vision of making comprehensive promotive, preventive, curative and rehabilitative services accessible to all and will be coordinated and paid through the Contracting Units for Primary Health Care (CUPs). They will be an integral part of district health services, contribute not only to clinical service delivery but, where appropriate, also clinical governance activities, and have strong working relationships with other elements of the district health care delivery platform.
 - 4.8 District Health Management Offices (DHMOs) will be established as government-components, reporting to the national sphere, to which responsibilities are delegated. Appropriate governance structures will be established at district level to ensure that these institutions serve the public interest.
 - 4.9 To ensure that the Fund purchases quality health services, the management of hospitals will be decentralised to ensure their effective functioning and sustainability. The delegation of management authority to public hospital facilities will be piloted.
 - 4.10 Central hospitals will have semi-autonomous boards and administration, management, budgeting and governance functions. The central hospitals will become government components and the competence of the national sphere of government. They will contract directly with the Fund.
 - 4.11 Provincial tertiary and regional hospitals or groups of hospitals and specialised hospitals will become semi-autonomous entities accountable to the Minister through regulation and whose functions can be delegated to a different sphere of government.

5. OBJECTIVES OF THE BILL

5.1 Principles

National Health Insurance will be based on the following overarching principles:

The goal of the National Health Insurance is to move towards universal coverage by the Fund serving as a strategic and active purchaser of personal health care services and by—

8. FINANCIAL IMPLICATIONS FOR THE STATE

The Fund will be financed in various interrelated phases as determined in consultation with the National Treasury:

- 8.1 The costing/budgeting focuses on practical issues, rather than general models (three of which were previously contracted). The latest focuses on three issues:
 - (a) Quality of care improvement programme: A new funding component is required to accelerate quality initiatives, to support a stronger response post OHSC audit and also to support progressive accreditation of facilities for Fund. Amounts of R75 million, R125 million and R175 million will be considered for potential reprioritisation as part of the budget process.
 - (b) Establishment of the administration of the Fund: The preliminary costing is R57 million, R145 million and R287 million. These should be seen as ideal and will probably be less given practical delays e.g. in passing Bill. Again in the short term these funds can largely be found through reprioritisation within the grant.
 - (c) Actuarial costing model: Treasury commissioned a simplified intervention-based costing tool for 2019/20 which provides simple estimates of costs of a set of 15 or so interventions. These include for example removing user fees, extending chronic medicine distribution programme (CCMDD), extending ARV rollout, increasing antenatal visits, rolling out capitation model for General Practitioners (GPs), cataract surgery programme, establishing Fund. The full set of interventions costs in the longer term around R30 billion per annum. Interventions can be scaled up progressively as funding becomes available and does not need significant new funds in Budget 2020.
- 8.2 Human Resource capacity is focussed in the first instance on statutory posts such as interns and community service, given problems in provinces funding these key posts and national interest in making sure these are fully funded.
- 8.3 Significant preliminary work that has commenced will be taken forward.
- 8.4 At the time the Bill was tabled, there was a rising Fund budget baseline (R4.2 billion was reprioritised from tax subsidy; NHI grant rises from R2.5 billion in 2019/20 to R3.1 billion in 2020/21) and under-spending in 2018/19 (around R600 million), which required that most of the short term funding for the above was derived from reprioritisation and rising baseline. The 2020/21 budget of R3.1 billion was already substantially above 2018/19 spending of R 1.7 billion.
- 8.5 Once the Bill is enacted and the entity is created, the Fund and its Executive Authority will be able to bid for funds through the main budget as part of the budget process.
- 8.6 Consideration will be given to shifting some of the conditional grants such as the National Tertiary Services grant and the HIV/AIDS and TB grant from the Department to the Fund. Shifting grants is a budget process and no statutory amendments are required.
- 8.7 In a later phase consideration will be given to shifting of funds currently in the provincial equitable share formula for personal health care services (currently the main public health funding stream consisting of around R150 billion per annum) to the Fund. This will require amendments to the National Health Act, 2003. This will also depend on how functions are shifted, for example if central hospitals are brought to the national level.
- 8.8 Chapter 7 of the Fund White Paper details several new taxation options for the Fund, including evaluating a surcharge on income tax, a small payroll-based taxes as financing sources for the Fund. Due to the current fiscal condition, tax increases may come at a later stage of NHI implementation.

9. PARLIAMENTARY PROCEDURE

9.1 The Constitution regulates the manner in which legislation may be enacted by Parliament and prescribes the different procedures to be followed for such enactment. Section 76 of the Constitution provides for the parliamentary procedure for ordinary Bills affecting the provinces. In terms of section 76(3) a Bill must be dealt with in accordance with the procedure established by either section 76(1) or section 76(2) if that Bill provides for legislation envisaged in section 76(3)(a) to (f) or if it falls within a functional area listed in Schedule 4.

9.2 In *Tongoane and Others v National Minister for Agriculture and Land Affairs and Others*ⁱ (“*Tongoane* judgment”), the CC confirmed and upheld the test for tagging that was formulated in *Ex Parte President of the Republic of South Africa: In re Constitutionality of the Liquor Bill*ⁱⁱ, where the CC held that—

“the heading of section 76, namely, ‘Ordinary Bills affecting provinces’ provides a strong textual indication that section 76(3) must be understood as requiring that any Bill whose provisions in substantial measure fall within a functional area listed in Schedule 4, be dealt with under section 76.”

9.3 At paragraph 50 of the *Tongoane* judgment the CC held that the tagging test focuses on all the provisions of the Bill in order to determine the extent to which they substantially affect the functional areas listed in Schedule 4 and not on whether any of its provisions are incidental to its substance.

9.4 The CC stated the following at paragraph 58 of the *Tongoane* judgment:

“What matters for the purposes of tagging is not the substance or the true purpose and effect of the Bill, rather, what matters is whether the provisions of the Bill ‘in substantial measure fall within a functional area listed in Schedule 4’.”

9.5 The CC further held that the test for tagging must be informed by its purpose. Tagging is not concerned with determining the sphere of government that has the competence to legislate on a matter. Nor is the purpose concerned with preventing interference in the legislative competence of another sphere of government. The process is concerned with the question of how the Bill should be considered by the provinces and in the National Council of Provinces, and how a Bill must be considered by the provincial legislatures depends on whether it affects the provinces. The more it affects the interest, concerns and capacities of the provinces, the more say the provinces should have on its content.ⁱⁱⁱ

9.6 To determine whether the provisions of the Bill in substantial measure fall within a functional area listed in Schedule 4, the Bill ought to be considered against the provisions of the Constitution relating to the tagging of Bills as well as against the functional areas listed in Schedule 4 and Schedule 5 to the Constitution.

9.7 The test compels the consideration of the substance, purpose and effect of the subject matter of the Bill. In view of the discussion above and after careful scrutiny of all the provisions in the Bill, we are of the opinion that the Bill in substantial measure falls within the ambit of “health services” which is an area listed in Part A of Schedule 4, which makes provision for functional areas of concurrent national and provincial legislative competence. As such, the

ⁱⁱⁱ Paragraph 60 of the *Tongoane* judgment.

State Law Advisers and the Department of Health are of the opinion that the Bill must be tagged as a section 76 Bill.

- 9.8 The State Law Advisers are of the opinion that there is no need for a referral of the Bill to the National House of Traditional Leaders as it contains no provisions pertaining to customary law or the customs of traditional communities as envisaged in section 18(1)(a) of the Traditional Leadership and Governance Framework Act, 2003 (Act No. 41 of 2003.)
